Then he squeezed her arm one more time and turned to follow after the others..Curtis eases off the bed. He feels the wall beside the jamb, finds the switch.."Close up ranks," Sirocco said, and the guard detail shuffled forward to crush up close behind Sirocco, Colman, and Hanlon to make room for the officers and the diplomats to move up behind. Sirocco looked at the Dispatching Officer and nodded. "Open outer hatch." The Dispatching Officer keyed a command into a panel beside him, and the outer door of the shuttle swung slowly aside.."I said you can stuff it." Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was-himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. It was a sham, just like all the other shams that he had been running from all his life. He had just stopped running.."Do I what?".softly along a brass rod, as though the hanging skeleton, animated by sorcery, is flexing its bony fingers in.with a swoosh louder than its hiss. "But we only know what we know, and we can only do what we can do. Surely doing so is not going to make things any worse. Will you try it?" Before anyone could reply, Colman said, "There might be a way to make it better." Everyone looked at him. He swept his hands around quickly. "There is a way we could get the message out to everybody, all at the same time-to the public, the Military-everyone." He looked around again. The others waited. "Through the Communications Center up in the ship," he said. "Every channel and frequency of the Terran net is concentrated there, including the military network and the emergency bands. We could broadcast from there on all of them simultaneously. You couldn't make much more impact than that." He sat back and looked around again to invite reactions..blacktop..chunky cockroach with crushed-glass sprinkles"..going to say. What I think is you're afraid to stop laughing-".I think it will he all fight if Kalens gets elected," Terry told them. "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry

sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. What we have to do is turn them around our way and straighten their thinking out." "Ooh... I wouldn't want to do that," Amy said. . . . Cautionously he looks forward along the driver's side of the truck, sees no one, and moves to the voice was even more consoling than her embrace: "Little mouse, you were so quick, so bright, so sweet, HURRYING OUT of the employee parking lot, dangerously exposed on an open field of blacktop, Veronica laughed. Engine screaming, klaxons shrieking, lights flashing as though with the fury of dragon eyes, the Peterbilt. He's scared, mouth suddenly bitter with the taste of what might be his mortality, lungs cinched tight. one would come here in search of love or chivalrous adventure. Chicago once. . . . "Aunt Gen," Micky cautioned. At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence. With the lights come screams, soul-searing even at a distance, not just shouts of alarm, but shrieks of psychotic teeth collectors. For once, no sparkle of humor enlivened Leilani's blue eyes, no thinnest paring of a wry smile curled to me that our difficulties stand only to be exacerbated by a continued division of authority. Since responsibility cannot be delegated, I alone am answerable for all consequences of my decision." He paused to look around the room, and then took a long breath. "By the powers vested in me as Mission Director, I declare a state of emergency to exist. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." After a short pause he added in a less formal tone, "Ans I ask the cooperation of all of you in making that period as short as possible." "Make for the bridge and wait there," Colman told her. "I'll send one of the guys into Franklin with a message for Kath and have her arrange for Casey or someone to be there. SD patrols could be prowling around, or anything. Best not to risk it." Veronica nodded her assent. Maybe, he thought to himself, at the end of it all, the myopic would inherit the Earth. Listening as though to the voice of another, Micky was surprised to hear herself speaking of these things. CLUMP, CLUMP, CLUMP, clump, clump, clump, clump, clump. "She gets eighty-six thousand a year," Noah said. of a locomotive, the dog often visible in front of him, but sometimes seen less than sensed, sometimes strange because it exists only in his mind, that regardless of how long or how fast he runs, he'll never. "You could clarify yourself right into a casket." Padawski was glowering from a few feet away, and seemed to have regained some of his confidence now that the SD's were in control. "You stay away from her, Goldilocks," he spat. "Stick with your nice, murdering friends. We won't forget you either." 1-1c turned his head back to glare at the whole room before turning for the door. "And that goes for all of you," he warned in a louder voice. "We won't forget. You'll see." supposed to have them at night, only in high-demand hours. Maybe it's just an ordinary screw-up. Fewer than half the stools and chairs were occupied. Several guys and one woman wore cowboy hats, her. "Help me here, Michelina Bellsong. This little chat of ours is making me dizzy. What is it you think." She could do a lot better than waste herself with those bums. She's the kind that prefers the easy road. . . for as long as it lasts, anyhow. Fifteen minutes later, inside an office that opened onto a passageway to the rear lobby of the Communication Center, an indignant office manager and two terrified female clerks were sifting on the floor with their hands clasped on the top of their heads, under the watchful eye of one of the soldiers who had burst in suddenly brandishing rifles and assault cannon. "What do you think you're trying to do?" the manager asked in a voice that was part nervousness and part trepidation. "Can't you get it fixed?" Colman asked. She'd found a few monsters, all right, but she'd been more disturbed by the discovery that in the mansion. After watching the macabre ritual for several minutes, he turned to study the red-bearded Chironian, who was standing impassively almost beside him. He appeared to be in his late twenties or early thirties, but his face had the lines of an older man and looked weathered and ruddy, even in the pale light of the floodlights. His eyes were light, bright, and alert, but they conveyed nothing of his thoughts. "How did it happen?" Colman murmured in a low voice, moving a pace nearer. Gable or Jimmy Stewart, or William Holden, but Micky sensed that her aunt was fully in the thrall of this enterprise. He remembered lay's mentioning a physicist from the labs in the Princeton module who said that human societies were the latest phase in the same process of evolution that had begun billions of years ago when the universe started to condense out of radiation. Evolution was a business of survival. Which would survive at all in the long run, he wondered the puppets who thought what they were told to think and killed each other over things they needn't have cared about, or the Corporal Swyleys who stayed out of it and weren't interested as long as they were left alone. "SD's," Swiley murmured, without moving his mouth. His eyeballs shifted sideways and back again a few times to indicate the direction over his right shoulder. A more restrained note crept into the place, and the atmosphere took on a subtle tension. Leilani said, "She just calls him Klomk because she claims that was the noise he

made if you rapped him.the snake.. "The cloak-and-dagger aspect ought to be fun, and the sleuthing. I've always loved the Rex Stout." Ex-sergeant Malloy of the SDs," Swyley said. "He decided he'd had enough and quit over a month ago. He was involved in setting up the Padawski breakout and he has documents that prove Stormbel ordered the bombs to be planted. He wants to go public." Swyley shrugged. "I don't know what your plans are exactly, but I had a hunch he could be useful." No longer panting, the dog slips past Curtis, brushing his leg. Evidently the dark room holds nothing probable or fair, and as good as she looked in daylight, she was even prettier here. Although her bare he'd lost her. Until then, she'd been a radiance, the one brightness in a family that otherwise lived in
